

# TECHNICAL DATA FOR TIPPING CONTAINERS

- Tipping containers are the industry's best tool for waste sorting, waste and material handling.
- Designed, reinforced and powder coated to provide maximum safety and service life.
- Spring pressure plate on the base frame for automatic emptying.
- Also with manual tipping.
- Other sizes are manufactured on request.

TIPPO have reinforcements in the right places in order to deal with rough truck handling.

- Corner reinforcements raise the stiffness of the containers.
- Reinforced fork channels.
- The stop lug is well dimensioned in order to deal with the forces it can be exposed to.
- The automatic tipping function does not only provide greater efficiency, it also raises safety during emptying at greater heights as TIPPO cannot slide from the forks.

Tipping containers are exceptionally suited to waste sorting.  
They can be supplied in colours as recommended by the public waste collection service.
